Translucent waterslides unveiled at Tai Po Aquatic Centre

Turkish waterslide manufacturer Polin has unveiled a trio of translucent waterslides at Hong Kong's Tai Po Aquatic Centre.

Polin replaced three existing slides with modified translucent Polin body slides coloured blue, yellow and purple - all produced using Polin's closed moulded

RTM (Resin Transfer Moulding) technology.

Polin's representative in Hong Kong, Winnie Lau, from Attraction HK Limited said "our clients were very satisfied with the quality of the new waterslides. The translucency of the slides are worth seeing."

Since 2006, Polin has converted to Resin Transfer Molding (RTM) on over 95% of its annual fibreglass production.

For more information contact Sohret Pakis of Polin Waterparks and Pool Systems on +90 262 656 6467, E: info@polin.com.tr, www.polin.com.tr
