WELCOME ABOARD: Polin Waterparks & Pool Systems has announced the addition of Volkan Sofuoglu to its management team to head the newly created technical operations and after-sales department, which was created after a recent company reorganization. Sofuoglu was previously head of the project management and installation divisions at ThysennKrupp Elevator and Escalator, where he managed multiple large-scale projects. At Polin, he will manage three departments—project management, engineering, and installation and after-sales.
