Polin

The water slide manufacturer from Turkey was represented by two new concepts: "Dragero" is a multilane slide with an uphill sequence, as well as the run being located at the foot of the tower, which saves the sliders a long walk. Newly introduced also was the "Double Wave Slide", a type of Boomerang-slide.

▲ Polin uses sunlight solely for colour effects in slide pipes, which is possible due to the patented RTM-technology (photo above left)
