

The race is on

New King Cobra ride at Cobra Kingdom Waterpark

The Cobra Kingdom Waterpark at Maxx Royal, Antalya, Turkey opened in June 2011 and is proud to announce the debut of the new King Cobra ride manufactured by Polin Waterparks & Pool Systems.

Since its launch at IAAPA Asia 2010, Polin's King Cobra waterslide has been greatly anticipated all over the World. Now the wait is over. The King Cobra has come to life and offers not only an intense and heart pounding experience to its riders, but also a stunning design and a one of a kind of visual to its spectators. The core feature is its unique configuration that enables two double tubes to race through a circular path with twists, turns, and surprises before experiencing the drop of their lives as they continue to race in the valley of the Cobra. This epic plunge is 8 meters down and allows the rider to accelerate to a speed of 51 km/h. The two double tubes are now heading into the mouth of Cobra. Unique fog, high-pitched hiss, water spraying, visual effects make it more exciting than ever while the spectators below think you are just „swal-

lowed“ in the mouth of the Cobra. Then powerful G-forces take over your tube and riders come back down and then oscillate up and down again as the tubes stop on down the waterslide. You come to the end of this unique riding experience. The new waterslide is both visually and in terms of riding experience just breathtaking.

The MAXX Royal Golf & Waterpark Resort is the first to have King Cobra, located on the Mediterranean Coast, in Belek, Antalya, Turkey. The hotel situated on an area of 400.000 m² is 45 km to Antalya city centre and 35 km to the Antalya Airport. The waterpark of the resort is located on 10,000 m² (approx. 107,640 square feet). The Waterpark as a whole and all kids' slides and articles were designed, manufactured and installed by Polin. The waterpark is designed to offer rides for the whole family. There are totally 10 waterslides including the King Cobra, a kid-sized water play area with numerous themed slides and fountains and a small water play structure together with slides, a tipping bucket and water guns.

All waterslides at MAXX Royal are RTM (Resin Transfer Molding) manufactured waterslides. RTM waterslide manufacturing technology which is a closed molded technology is the latest and best production method in waterslides. These slides offer more since they add value to the general appearance of the park with its smooth and perfectly shiny finish on both sides and its newly designed forms.

After King Cobra's debut at Cobra Kingdom, the second installation has also been completed on July 11th in Russia at Djubga Waterpark.
